

# SEARCH ENGINE OPTIMIZATION (SEO)

“Rank on the top #1-3 on Google, or be invisible. Your choice.”

## What is SEO?

Search Engine Optimization (SEO) is a set of proven practices that brings your website to page 1 of Google and other search engines by optimizing your website content and structure in line with Google’s ever-evolving guidelines.

Rank on the first page of Google above all your competitors. Imagine how your business could perform if you dominated client visibility, clicks, and revenue 24/7.

Know exactly how many people searched for a business like yours through different keywords each month, in every country.

Obtain an in-depth technical audit to see what’s holding your website back in every area. We will work with web developers on your behalf so you don’t have to.

Gain in-depth on and off-page SEO optimization that includes everything from technical optimization, content writing in different languages, image optimization, load speed, user experience and more.

Receive monthly SEO articles using strategic keywords to boost your rankings.

Compare your SEO performance with up to 10 competitor websites. Know exactly how much market share they are getting and what they are good at.

Strategize SEO plans to get your business to the top of your specific industry.

Enjoy the benefits of our website conversion tracking included with real-time reporting.
